

Eaton satellites

Solutions for every industry

EATON

Powering Business Worldwide

Eaton satellites

Experience unparalleled customer commitment

Proven expertise

- Turnkey application engineering and design support
- Integrated design capabilities specific to industry needs
- Service engineering and field consultation
- Hands-on training
- In-house project management, customer approvals and inspections

Rapid support and delivery

- Industry-leading delivery with superior quality
- 24 hours a day, 7 days a week emergency and disaster recovery services
- Same-day delivery
- Local customer pickup available

Customized solutions

- Standard and custom manufacturing capabilities to meet industry-specific project needs
- Rapid equipment retrofit, reconditioning and/or replacement services—regardless of manufacturer
- Emergency response and quick-ship scheduling
- Expert power system audits and analysis

Data center

Protect the backbone of your business

[Eaton.com/datacenter](https://www.eaton.com/datacenter)

Eaton solutions help enhance data center power management to drive real business benefits.

Increased efficiency without sacrificing uptime

Eaton satellites can customize mission-critical data center power management solutions to meet your specific needs—ensuring a steady flow of high-quality power while making the most efficient use of resources.

A more flexible data center design

Modularity, flexibility and proportionality help you manage an adaptive IT business system with data center designs that are responsive to change.

Faster time to market

Rapid support and regional expertise, coupled with our expert data center engineers, can help you accelerate the design, construction and commissioning of your data center at the lowest total cost of ownership.

Mining

Drive continuous improvement

[Eaton.com/mining](https://www.eaton.com/mining)

Eaton satellites can help manage costs and capital, mitigate risk, protect people and equipment and ultimately improve cost per ton—at every stage of the mining process.

On-time construction and engineering expertise

Eaton satellites provide rapid support, customized solutions and regional knowledge to help you meet aggressive project timelines. Our engineering expertise allows local on-board drawing approval and local factory acceptance testing, ensuring on-time project execution and benchmark product quality.

Increased uptime in critical operations

Eaton's rugged products, innovative designs and local expertise deliver performance and maximize uptime to assure continuous operation, even in harsh environments.

Innovations to protect people, property and the environment

Eaton's broad portfolio of product technologies based on "Safety by Design" protects workers from electrical hazards including shock and arc flash. Our local experts are up to date on all of the latest codes and standards to assist in the protection of all of your business assets.

Oil and gas

De-risk
by design

[Eaton.com/oilandgas](https://www.eaton.com/oilandgas)

The capabilities of Eaton satellites enable you to optimize performance, increase operational predictability and protect your people and profits to elevate your business operations.

Reduced complexity to optimize performance

Eaton customized power management solutions help simplify power system design with expert project management to help optimize investment and reduce risk.

Increased operational predictability

Eaton's local engineering and service network helps improve uptime and reduce costs, while innovative products increase endurance to provide longer life cycles in harsh environments.

Innovation to protect people and profits

Eaton offers a range of products, including remote monitoring and communication solutions that remove people from danger and prevent interruptions. Eaton also offers solutions designed to prevent arc flashes in high-risk environments, prevent/suppress the ignition of explosive gases and dust and eliminate operator exposure.

Utility

Design, build and maintain an automated, secure and cost-effective grid

[Eaton.com/utility](https://www.eaton.com/utility)

Eaton is an industry leader in providing generation, transmission and distribution solutions for the utility segment.

Build an adaptable, secure and responsive infrastructure

With a wide range of modernization services, you can extend the life of current assets and refurbish plants and facilities to reduce delivery interruption frequency and duration. Integrate a “Smart” apparatus with enterprise-level software to achieve a dynamic, resilient, two-way grid.

Distribute reliable, efficient and high-quality power

Eaton expertise helps transform, protect, connect and build out the electric power system backbone to optimize asset efficiency and reduce your system operating costs. Manage complex, integrated solutions and turnkey projects including fully engineered, assembled, and tested solutions delivered on-site ranging from complex electrical assemblies to integrated automation.

Protect people, property, processes and the environment

For utility projects, visit our satellite to design a robust power infrastructure that will enhance safety, provide protection against environmental risk factors, prevent arc flashes and meet sustainability regulatory requirements.

Healthcare

Around-the-clock
reliable power

[Eaton.com/healthcare](https://www.eaton.com/healthcare)

Meet modern expectations and maintain a high standard of reliability—because healthcare facilities simply cannot afford interruptions in power.

Focus investment on patient care

Eaton's wide range of modernization and equipment life extension services help healthcare facilities take a cost-effective approach to improving electrical reliability, safety and efficiency.

Ensure always-on power for the essential electrical system

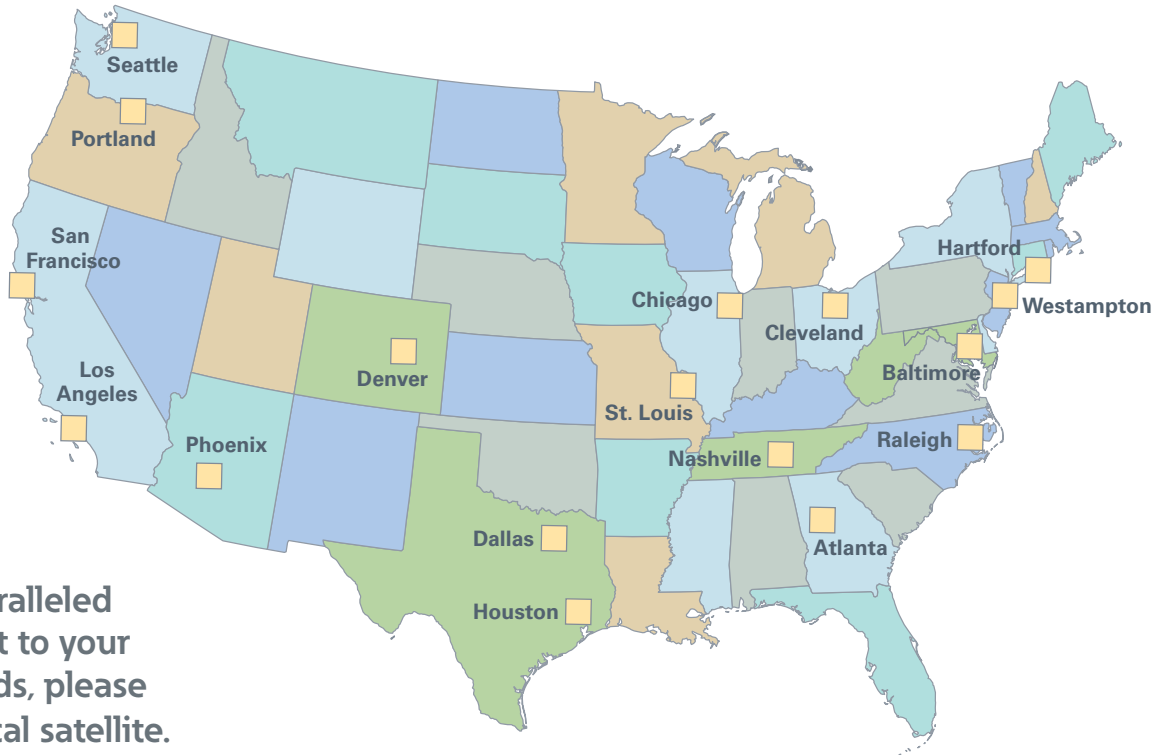

Eaton helps to ensure that your facility has the power it needs with innovative backup power protection, advanced power distribution equipment, predictive diagnostic tools and maintenance and testing services.

Safeguard patients, visitors and staff

Eaton's focus is on innovating products that maximize safety and comfort. From products that are designed to reduce hospital-acquired infections to lighting that is designed specifically for the environment and mass notification systems that alert in case of emergency, Eaton ensures that patients, employees and visitors are always comfortable and protected.

Support capacity needs with on-time project construction

Eaton satellites offer proven project management and expert design capabilities to support community healthcare needs by enabling on-time project construction and helping you meet your project goals.

For an unparalleled commitment to your specific needs, please visit your local satellite.
